

IN THE CLAIMS

Please amend claims 5, 7, 10, 13, 15 and 18 as follows:

1. Cancelled
2. Cancelled
3. Cancelled
4. Cancelled
5. (Currently Amended) A paper layer coated in direct contact with a conductive polymeric composition comprising an aqueous methyl methacrylate resin base containing a quaternary ammonium compound in an amount of about 1 to about 10 wt% based on the weight of the composition, a polyethylene wax, and optionally zinc oxide to impart a static dissipative property and a conductive property to said paper layer.
6. Cancelled
7. (Currently Amended) The paper layer of claim 5, further comprising an aqueous dispersion of zinc oxide particles.

8. Cancelled

9. Cancelled

10. (Currently Amended) A package comprising a layer of a conductive polymeric composition comprising a composition consisting of an aqueous acrylic resin base containing a quaternary ammonium compound in an amount of about 1 to about 10 wt.% based on the weight of the composition, polyethylene wax and optionally zinc oxide to impart a static dissipative property and a conductive property to said polymeric composition, in direct contact with at least one material selected from the group consisting of paper, fabric and non-woven material.

11. (Previously Presented) The package of claim 10, wherein said at least one material further comprises a metallized surface.

12. (Previously Presented) The package of claim 10, wherein the material is paper.

13. (Currently Amended) The package of claim 12, further comprising an aqueous dispersion of zinc oxide particles.

14. Cancelled

15. (Currently Amended) A laminate comprising:

an intermediate layer comprising at least two laminae, and on both sides of the intermediate layer as outer layers of the laminate,

a coating, the coating comprising:

an aqueous acrylic resin base containing a quaternary ammonium compound in an amount of about 1 to about 10 wt% based on the weight of the coating, and a polyethylene wax emulsion.
16. (Previously Presented) The laminate of claim 15, wherein said at least one said at least two laminae are independently selected from the group consisting of plastic, fabric, non-woven material or paper.
17. (Previously Presented) The laminate of claim 15, wherein at least one of said at least two laminae has a metallicized surface.
18. (Currently amended) The laminate of claim 15, wherein said coating further comprises at least an aqueous dispersion of zinc oxide.
19. Cancelled
20. (Previously Presented) A package comprising the laminate of claim 15.
